

Easy-fit Water Saving Cap for Urinals

The simple solution to reducing costs and your carbon footprint as well as improving the overall washroom experience. The caps contains millions of friendly bacteria that combats all the nasty odours common to urinals and allows you to reduce the flushing frequency to 3-5 flushes per day. Our unique design features our bestselling and original Bio Block inside a water saving cap, with a two designs of simple 'snap in' stems depending on the urinal.

- Easily replaced—no tools required
- Substantial blockage reduction • Up to 95% water savings
- UK manufactured
- No installation cost, simple 'snap in' product
- 100% recyclable

The urinal cap is a contained dosing system, which has bacteria that is slowly released into the urinal trap and pipes, constantly cleaning and deodorising.

These bacteria remove the cause of washroom odours and break down the solids, including urine crystals and calcium deposits that cause blockages.

STORAGE

When not in use, keep closed in the original container. Keep out of the reach of children.
